Professional Summary

AI & ML undergraduate with strong analytical mindset and hands-on experience in building real-world projects in machine learning, cloud security, and application development. Skilled in Python, data analysis, and problem-solving with exposure to deploying scalable applications on cloud platforms like Render. Seeking opportunities in AI/ML, Data Analytics, Cloud Security, or Technology Consulting.

Skills

- Python, Machine Learning, Data Analysis
- SQL (Basic), Excel (Advanced: Pivot Tables, VLOOKUP)
- Flask, OpenCV, CNN
- Power BI (Basic), Cloud Deployment (Render)
- Problem Solving, Analytical Thinking, Team Collaboration

Projects

DDoS Attack Detection & Protection System (Cloud-Based)

- Developed a system to detect and mitigate DDoS attacks using traffic pattern analysis
- Deployed the system on cloud using Render for real-time monitoring
- Implemented anomaly detection logic for identifying malicious requests
- Gained practical exposure to cybersecurity, cloud deployment, and debugging

Medical Recommendation System

- Built ML model using Random Forest for disease prediction
- Developed Flask-based web interface for real-time predictions

Face Recognition & Sign-to-Text System

- Implemented CNN + OpenCV based biometric system
- Built gesture-to-text feature for accessibility

Bhojan Connect – Food Ordering App

- Developed Android app using Kotlin & Firebase
- Implemented real-time features and backend integration

Education

B.Tech in Computer Science (AI & ML)
Lokmanya Tilak College of Engineering (2022–2026)
HSC: 82.33% | SSC: 74.20%

Certifications

- Python for Data Science – Google
- Data Science & ML Workshops – Acadbuddy
- Cyber Safety & Ethical Hacking – Acadbuddy
- Digital Marketing – IIDE

Extracurricular

- Winner – Zephyr Dance Competition
- Anchor – Model Business Summit
- NSS Volunteer
- State-level Kabaddi & Kho-Kho player
